- Gas pistons situated inside the hem bar.

## 2 Standard Colors

## Many Fabric Options

# COVERAGE SYSTEM

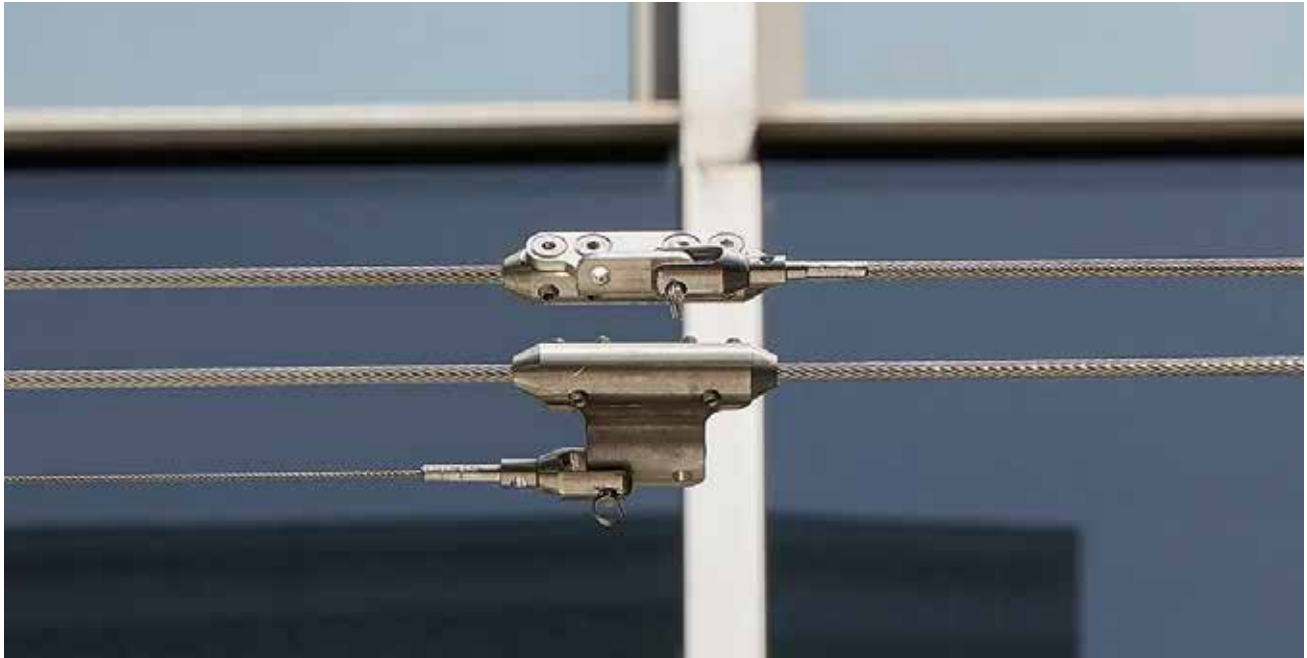

## Key Features:

- Design allows versatile movement of the fabric in any direction
- Suitable for outdoor use, making it ideal for pergolas.

Suitable for any type of structure; an elegant motorized blind perfect for pergolas, skylights, and large terraces.

# CABLE GUIDED ROLL

## Key Features:

- Prevents fabric from “swaying” in the wind

With this system, you can rest assured that your patio area will remain clean and comfortable, as it helps prevent fabric swaying during high winds, keeping it in place

# TRACTION KIT

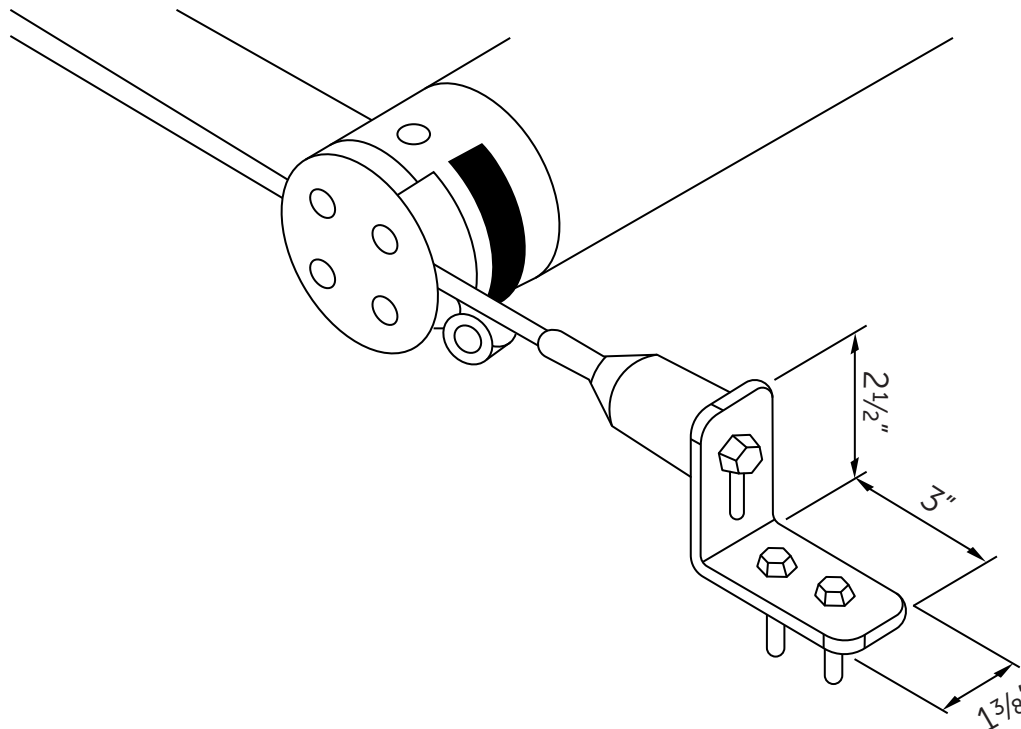

## Key Features:

- Guarantees strong fabric tension for outdoor use.
- Uses gas pistons to counteract wind force.

The traction kit is an exclusive forced traction mechanism designed to guarantee exceptional fabric tension, suitable for outdoor applications. The system efficiently contrasts the force of the wind using the controlled energy of the gas pistons situated inside the round hem bar.
