

FAN MOUNT AND BAR - PERGOLA FAN SYSTEM

Customer Supplied Fan Requirements:

- Outdoor fan: wet rated fan
- Remote control operated

Mandatory Requirement: When integrating an outdoor wet-rated fan accessory into your pergola structure, it is imperative to assess the following criteria. If your pergola lacks a central support beam, you must install a fan bar. Additionally, if you have a specific location in mind for the fan, ensure that a fan bar is in place to support the electrical components and sustain the weight of the wet-rated fan.

*Ensure successful installation by utilizing a **fan bar** when your pergola lacks a central support beam.
