WATERTIGHT SOLID ROOF

Key Features:

• Keeps patios and pergolas dry in all weather conditions.

• Optional sloped roof and integrated gutter system for added functionality.

Enjoy superior outdoor living with our Insulated Roof Panels. Designed for patios and pergolas, these watertight panels prevent water seepage, ensuring reliable protection. Upgrade your space with a sloped roof or integrated gutter system for added functionality and style.
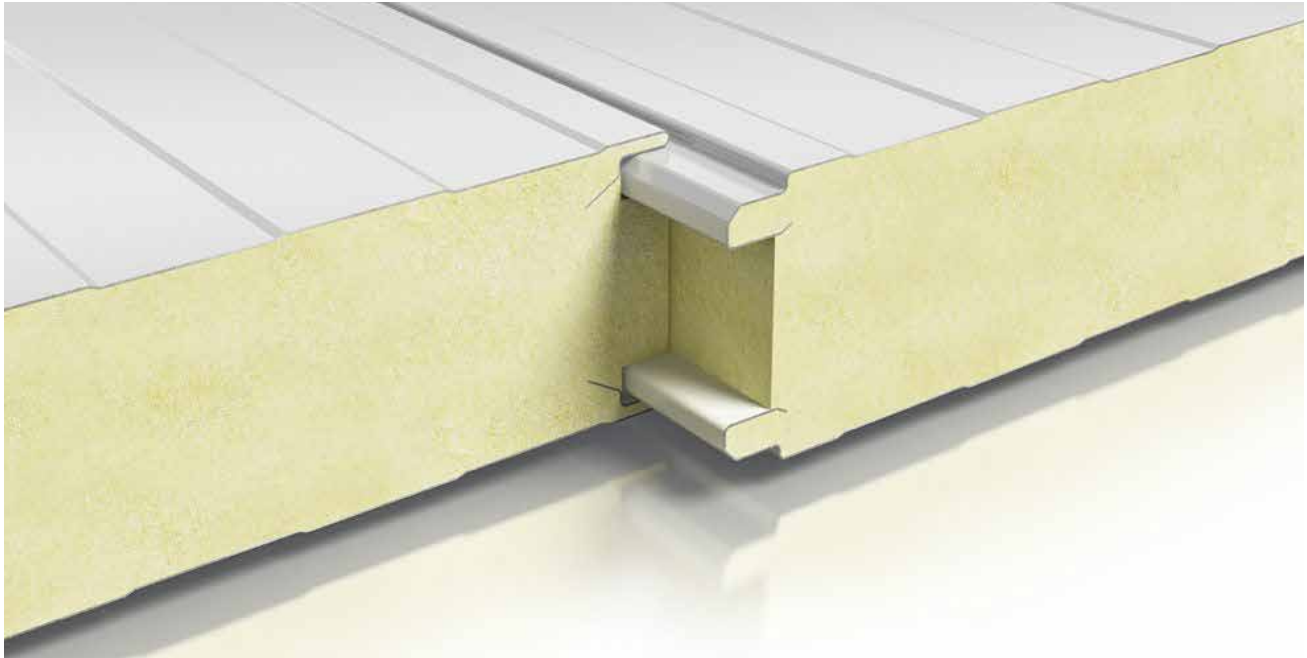

COMFORT CONTROL

Key Features:

• Blocks sun, rain, and snow while reducing summer heat and retaining

winter warmth.

• Combine with outdoor-rated fans for cooling during hot summer days.

Protect your outdoor space with Insulated Roof Panels. They block sun, rain, and snow, while reducing summer heat with outdoor fans. In winter, they retain warmth, ideal for four-season patio rooms.
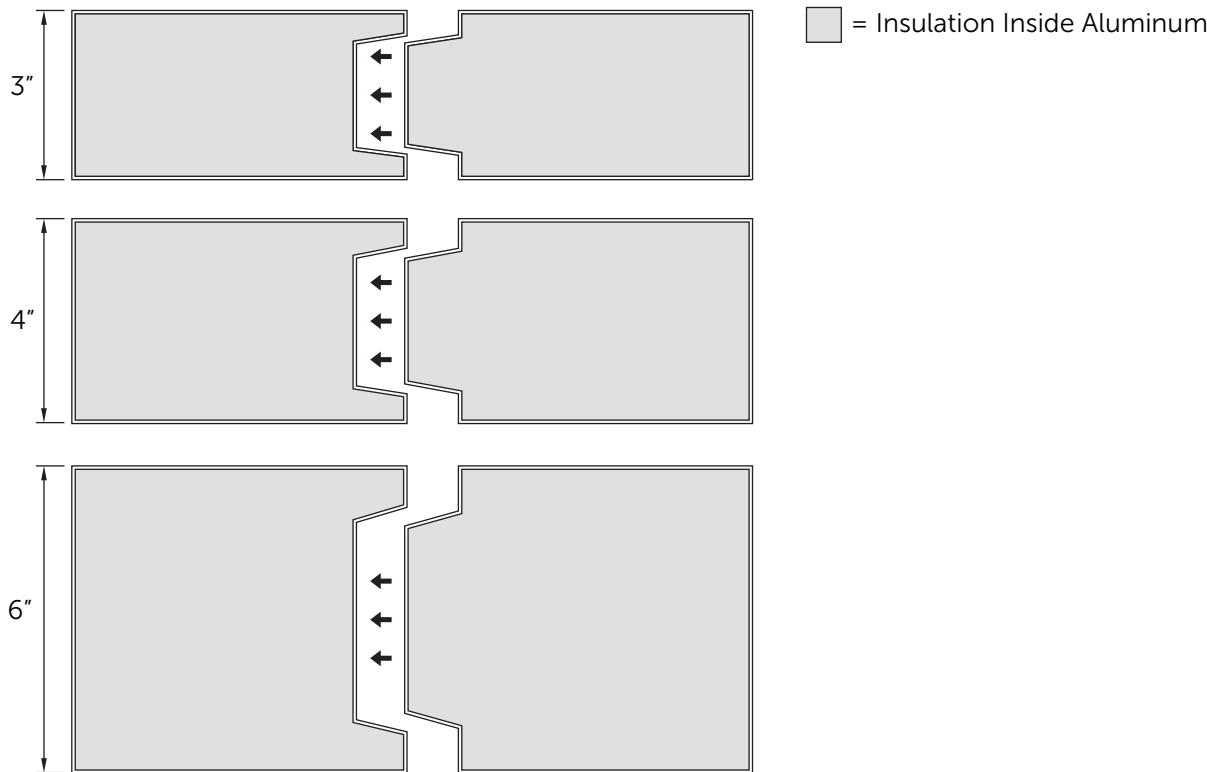

SANDWICH PANEL CONNECT

Key Features:

• These panels lock into each other seamlessly, making installation quick and straightforward.

• Connect the panels side by side effortlessly, layering like a sandwich for a perfect fit.
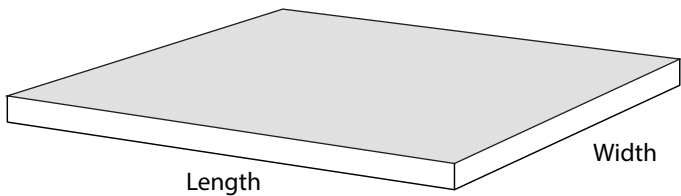

These panels effortlessly lock into each other, layering like a sandwich when connected side by side. Ideal for installers, they ensure a quick and easy setup, saving time and effort on every project. Available in various colors to match your outdoor structure or pergola, they provide both functionality and aesthetic appeal.
