ENERGY EFFICIENT & WATER EFFICIENT

Key Features:

- Operates with low power consumption and high-pressure output.
- Enjoy reduced energy and water bills while maintaining optimal comfort.

The Mist ES Misting System for your pergola is energy and water-efficient. It operates with low power consumption and high-pressure output, saving both energy and water costs.

ANTI-DRIP TECHNOLOGY

Key Features:

- The brass body, with a stainless steel orifice, ensures that it stays dry even when the mist system is not in use.

The Mist ES misting system, designed specifically for your pergola, features advanced anti-drip technology. Its brass body, paired with a stainless steel orifice, remains dry even when the mist system powers down.
