PRIVACY BLOCK-OUT

Key Features:

- Versatile Design: complement any patio setting, whether for design aesthetics or privacy.
- Shutter panels also provide sun protection

Shutter panels complement any patio setting, whether for design aesthetics or privacy. Our custom-tailored shutter panels are adaptable to any required size and also provide effective sun protection.

MOVING SHUTTER PANELS

Key Features:

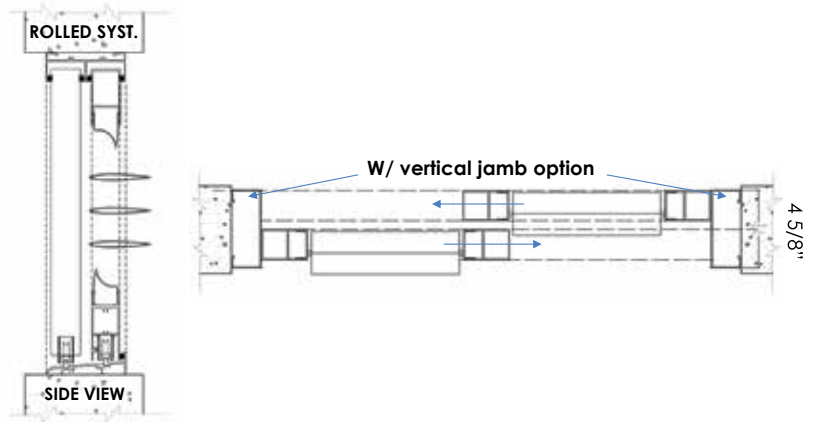

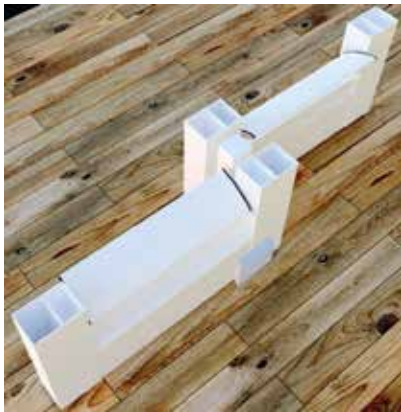

- Shutter panels fully retract, creating an open patio space.
- Choose between sliding panels or folding panels to suit your preferences.

Our versatile shutter panels offer the flexibility to fully retract, creating an open and inviting patio space. Choose from either sliding panels or folding panels to suit your preferences.

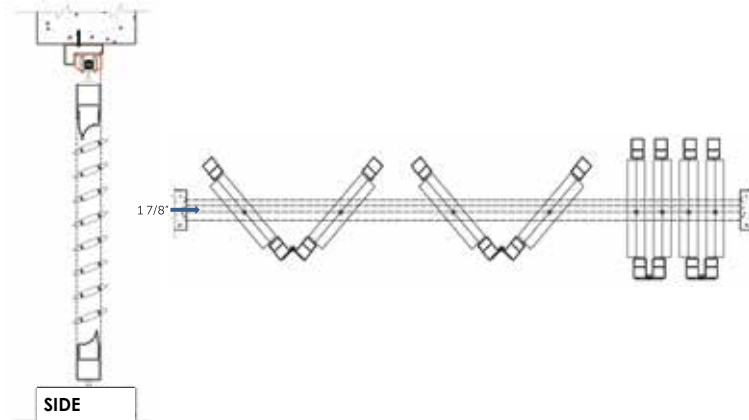

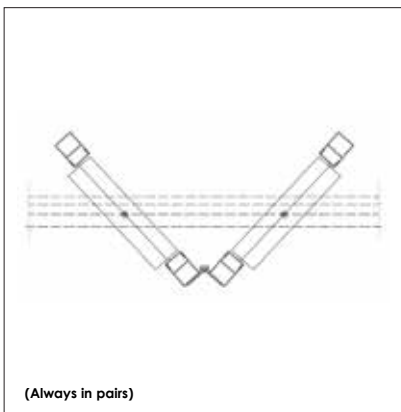

SHUTTER PANELS ES - SPECIFICATIONS

Slider - Shutter Panels (Option #1)

Pivoted - Shutter Panels (Option #2)

OPERATION PARAMETERS

OPERATION

The Customer understands that excessive & extraordinary weather conditions may cause damage to the product, the product may not perform optimally or may not function at all. Care should be taken at all times by the owner. TDSC does not take any responsibility for personal, or property damage caused by weather or improper use and handling.

OPERATION PARAMETERS

SUN: Shutter Panels can be used for sunshade when closed.

RAIN: Shutter panels may reduce direct rainfall but are not intended to serve as a watertight barrier. The hardware is specifically rated for outdoor use and can withstand prolonged contact with rainwater without degrading.

WIND: Shutter panels are engineered to disrupt and reduce wind flow under normal conditions. During periods of high wind velocity, it is recommended that panels remain in the open position to minimize structural stress and potential damage.

SNOW: Although shutter panels do not provide full snow protection, they are capable of handling snow contact and moisture without compromising durability.

TEMPERATURE: Shutter panels are rated for installation across all climate zones and are unaffected by low ambient temperatures.

HAIL: Hail damage is not covered by warranty.

OBSTRUCTIONS: Before closing shutters, check to ensure they are free of all obstructions.

* The above weather conditions are manufacturer recommendations only.
