- 4" slat

OPERATION PARAMETERS

OPERATION

The Customer understands that excessive & extraordinary weather conditions may cause damage to the product, the product may not perform optimally or may not function at all. Care should be taken at all times by the owner. TDSC does not take any responsibility for personal, or property damage caused by weather or improper use and handling.

OPERATION PARAMETERS

SUN: Slat Walls reduce sun exposure without fully blocking it.

RAIN: Although Slat Walls do not offer complete rain shielding, they are designed to tolerate precipitation and resist corrosion under wet conditions.

WIND: Constructed to endure wind stress, Slat Walls interrupt wind momentum without compromising airflow or slat separation.

SNOW: Although Slat Walls do not provide full snow protection, they are capable of handling snow contact and moisture without compromising durability.

TEMPERATURE: Slat Walls are rated for installation across all climate zones and are unaffected by low ambient temperatures.

HAIL: Hail damage is not covered by warranty.

OBSTRUCTIONS: Foreign objects and environmental debris are not covered under warranty. Users should inspect regularly and clear any obstructions to maintain system integrity.

* The above weather conditions are manufacturer recommendations only.
